STAY COMPLIANT, ORGANIZED, AND IN CONTROL WITH A UNIFIED ARCHIVE OF ALL YOUR COMMUNICATIONS

Global Relay Archive is a scalable cloud repository designed to capture and retain electronic communications from across organizations, adapting to changing business needs while meeting strict recordkeeping and security requirements for highly-regulated industries. With more than 20 years in the cloud, Global Relay provides innovative solutions for data preservation while equipping firms to handle litigation scenarios, audit requests, and investigations.

SEARCH 100+ DATA TYPES including email, social media, IM, web, trading platform, voice, and trade ticket data. Virtually every aspect of a message is searchable.

COLLABORATE WITH TEAM MEMBERS by using drag-and-drop to share Archive data, confident that data access rights are being preserved.

GET SEARCH RESULTS IN SECONDS even on the largest data sets. View results in a powerful but easy-to-navigate user interface.

VISUALIZE RELATIONSHIPS between individuals, groups, and organizations in real time without exporting data.

VIEW 'INSIDE' CONVERSATIONS and discover actionable insights hidden within your data.

VIEW MESSAGES IN AN EASY-TO-READ FORMAT with summary tables that provide at-a-glance details about every participant in a conversation.

ONE UNIFIED SOLUTION FOR MULTIPLE BUSINESS NEEDS

REGULATORY COMPLIANCE

Streamline compliance with the complex recordkeeping, supervision, audit, privacy, and continuity requirements of the SEC, FINRA, FCA, and other regulators.

SUPERVISION

Simplify the supervision of electronic communications in even the most complex regulatory environments by leveraging classification, policies, AI, and integrated workflows and tools.

eDISCOVERY

Dramatically reduce eDiscovery costs and identify legal risk in minutes, not days - with rapid search and analytics results returned on even petabytes of data.

INFOSEC AND AUDIT

Know your vendor meets the highest standard for data security, quality, and availability. Global Relay owns and operates its entire technology stack - software, hardware, and primary data center - backed by a 250+ strong development and operations group, including an in-house CSOC.

INFOGOV

Manage your electronic data governance. Reduce litigation costs, improve data security, comply with privacy laws, enforce records management, and reduce risk of fines.

CYBERCRIME

Discover actionable insights hidden within your data. Analytics, case management tools, and the ability to view "inside" conversations enable you to quickly make sense of complex data.

GDPR

Satisfy the three GDPR goals of control, trust, and simplicity by providing your organization with a clear visibility, understanding, and control over the data you collect and process.

TRADE RECONSTRUCTION

Accelerate trade reconstruction using powerful search and analytics features to identify trade data, including voice, emails, IM, trading terminal communications, and trade tickets.

GLOBAL RELAY: ESSENTIAL BENEFITS

Unlimited storage in a secure, private cloud

SOC 2 audited / ISO 27001 certified services and data centers

3rd party downloader and legal filing service

Assistance with eDiscovery and regulatory audits

24x7x365 live support via phone, email, and web

Unlimited personalized training sessions
